LOCATED IN GENOVA, OPERATING AT THE HIGHEST STANDARDS OF SAFETY, QUALITY AND ENVIRONMENT

NEL PORTO DI GENOVA, AI PIÙ ALTI LIVELLI DI SICUREZZA, QUALITÀ E RISPETTO DELL'AMBIENTE

SUPERBA TERMINAL WAS BUILT ON AN AREA OF 22,000 SQM TO MEET THE INCREASING TRADE THAT HAD ALWAYS NATURALLY LINKED THE PORT OF GENOVA TO NORTHERN ITALY AND EUROPE. Directly connected to the Moltedo Oil Port facilities for loading/unloading vessels, Superba has, through the years, become the most important base for the supply of chemicals and petrochemicals to Northern Italian industries. Provided with management safety systems set according to the highest international standards, the terminal specialises in storage and handling services for bulk chemicals and petrochemicals without performing any transformation, processing or blending of products inside the installations.

IL DEPOSITO COSTIERO SUPERBA NASCE SU UN'AREA DI 22.000 MQ SULLA SPINTA DEI TRAFFICI CHE DA SEMPRE DA GENOVA PORTANO ALLA PIANURA PADANA E DA QUI ALL'EUROPA. COLLEGATO DIRETTAMENTE al porto petroli di Genova, da cui riceve prodotti petrolchimici, il terminal si è andato affermando nel corso degli anni come interfaccia principale del sistema industriale del Nord Italia. Superba, i cui sistemi di gestione rispondono ai più alti standard di sicurezza nazionali ed internazionali, è specializzata nello stoccaggio e nella movimentazione di prodotti chimici e petrolchimici. All'interno del deposito non si effettua alcun tipo di lavorazione, manipolazione e/o miscelazione dei prodotti.
